

PRIMAFLOW COVID-19 RISK ASSESSMENT STATEMENT

Our key objective is to keep our staff, customers, suppliers and everybody else with whom we interact safe from COVID-19. We do this whilst maintaining existing standards of health and safety in everything we do and complying fully with Government guidance.

What have we done?

We have appointed at least one COVID-19 champion at each site whose responsibilities include promoting good practice and dealing with staff concerns.

Each of our sites has completed a detailed risk assessment and checklist covering all activities and these are reviewed at least once a fortnight by the managers and COVID-19 champions.

All of our sites meet the requirements of the Government COVID-19 Secure guidelines and display the COVID-19 Secure poster.

- We have carried out COVID-19 risk assessments and shared the results with our staff and others who need to know.
- We have cleaning, handwashing and hygiene procedures in line with the guidance.
- We have taken all reasonable steps to help people work from home.
- We have taken all reasonable steps to maintain a 2M safe distance in all our workplaces.
- In the small number of instances where people cannot be 2M apart, we have done everything possible to manage the transmission risk and this has been documented.

Detail.

Consultation, advice and communication.

Our staff continue to be widely involved in the planning and implementation of our COVID-19 strategy. This has been achieved through our regular consultations and dedicated consultations specifically in relation to the pandemic.

We have the benefit of advice from our in-house health and safety professional and internal audit team. Our approach to COVID-19 is overseen by the Operations Development Director with the direct involvement of the CEO and other Directors.

We conduct real-time audits and workplace inspections to make sure high standards are being maintained.

All staff are given a COVID-19 induction and are kept apprised with a range of best practice guides, regular updates at least fortnightly, and other less formal methods such as toolbox talks and online meetings. These provisions apply equally to staff returning to the workplace after an absence.

Whistleblowing.

All staff are made aware of our whistleblowing policy and posters are prominently displayed at all locations. The whistleblowing line can be anonymous and all calls are handled at Director level. The line is also available to third party visitors and customers.

PRIMAFLOW COVID-19 RISK ASSESSMENT STATEMENT

Protecting sick and vulnerable people.

Robust policies are applied to make sure staff do not travel to work if they have symptoms and visitors are reminded on arrival via posters. These policies also cover staff falling sick whilst at work.

All staff and visitors are required to take their temperature on arrival and will go home immediately if it exceeds 38°C.

Vulnerable people are protected in line with Government guidance.

Getting to work.

Staff have been made aware of the Government guidance on travelling safely and we make every effort to accommodate individuals' requirements. We have reviewed car parking arrangements to ensure safe distancing and where there is demand we have facilitated bike storage and additional parking spaces.

Hygiene.

We have significantly increased our cleaning regimes covering all areas, vehicles, and equipment. Staff are actively required and encouraged to maintain high standards of hygiene.

- Cleaning materials are provided at key locations including entry and exit points and frequent touch points.
- Frequent touch points and equipment are regularly cleaned as often as necessary. This is at least twice per shift and more often if equipment is shared.
- Windows and internal doors are left open where possible although we are careful not to compromise fire safety and fire doors are kept shut or held open by door retainers.
- Disposable gloves are provided for some activities.

Social distancing.

All sites demonstrate and give confidence to the workforce that social distancing is consistently achieved without compromising other H&S requirements.

Start and finish times have been staggered at sites where this is necessary to avoid congestion at busy times.

We have introduced one-way systems in offices, warehouses, yards and other areas wherever practical.

Workstations and work procedures have been adjusted to reduce interaction and protect people.

There are a small number of activities where the 2M requirement cannot be achieved. Such activities have been stopped unless they are essential for business, or provide an essential service such as installing appliances at care homes or sheltered accommodation.

PRIMAFLOW COVID-19 RISK ASSESSMENT STATEMENT

Any such activities that have been allowed to continue fully meet published guidelines and all necessary precautions have been taken.

Warehouses and yards.

Wherever possible, there is no sharing of work equipment such as fork lift trucks, barrows and tools. Where such sharing cannot be avoided, enhanced cleaning regimes are in place and the number of users is restricted to the absolute minimum.

We also have clear procedures for goods-inwards to eliminate contact with incoming delivery drivers.

Trade counters / shop areas / collection points.

'Customers are encouraged to place orders by telephone, email or via our website and use the delivery option rather than collect the goods in person.

Our procedures are based not only on Government standards but on industry best practice including guidance issued by the Builders Merchant Federation and The Electrical Distributors Association.

Some of our trade counters have been temporarily closed and replaced with outside collection points.

Where the trade counters remain open, customer access is strictly controlled and plexiglass barriers are used where we have identified the potential for social distancing measures to be breached.

Enhanced cleaning regimes are in place.

Outgoing deliveries.

Revised procedures are in place to make sure our delivery drivers do not come into contact with other people during deliveries. For example, we agree procedures in advance with all our customers, do not require physical signatures, never share equipment, and have introduced enhanced cleaning regimes for all vehicles.

Existing hazards.

All existing risk assessments and work procedures have been reviewed to make sure staff are not at increased risk due to COVID-19 related changes to procedures or staffing changes.

This includes the provision of first aiders, fire marshals, and qualified operatives such as fork truck operators, and gas and electric fitters.

Staff temporarily working from home.

Staff working from home have been given written guidance on working safely and comfortably from home and managers regularly keep in touch through a range of media.

PRIMAFLOW COVID-19 RISK ASSESSMENT STATEMENT

We are also aware of the potential impact on people's mental and physical wellbeing and follow the Government guidance which has been shared with staff.

Contractors and others at our sites.

We have procedures in place to make sure contractors and others at our sites apply the same high standards as our own staff.

- Where necessary, work has been postponed.
 - Contractors are not allowed on site unless their own risk assessments and work practices demonstrate how they will work safely and in line with Government guidance.
 - Social distancing and hygiene are maintained throughout the time any third party is on our site.
 - Staff have been briefed on how to deal with contractors and other visitors, including action to take if they behave irresponsibly or contrary to their method statements.
